

Appendix E: Success Rubric

Use the rubric below to evaluate students' work and solutions according to the five main Success Criteria.

	Outstanding	Good	Fair	Poor
Innovation	<ul style="list-style-type: none"> Design or solution represents a breakthrough in thinking about the problem 	<ul style="list-style-type: none"> At least one major element of design or solution is novel 	<ul style="list-style-type: none"> Minor elements of design or solution are novel 	<ul style="list-style-type: none"> Design or solution is not innovative
Quality of Presentation	<ul style="list-style-type: none"> Presentation is exceptionally clear and concise Presentation addresses each required element effectively and engagingly Visuals are used to enhance presentation as appropriate Length and number of slides conform to guidelines and suit the content presented 	<ul style="list-style-type: none"> Presentation is clear and concise Presentation addresses each required element effectively Length and number of slides conform to guidelines and suit the content presented 	<ul style="list-style-type: none"> Presentation includes all required elements, but may address some more effectively than others Presentation adequately explains how concept or design works, but may be wordy, repetitious, or monotonous Length and number of slides conform to guidelines 	<ul style="list-style-type: none"> Presentation is unclear, inaccurate, or missing required elements Presentation may exceed required length or include too many or too few slides
Commercial Viability	<ul style="list-style-type: none"> An interesting and viable market exists for the product or solution The product or solution could be commercialized within two years or less Students have developed a clear strategy for commercialization 	<ul style="list-style-type: none"> A viable market exists for the product or solution The product or solution could be commercialized within a reasonable time frame Students have considered strategies for commercialization 	<ul style="list-style-type: none"> A market exists for the product or solution The product or solution could be commercialized 	<ul style="list-style-type: none"> The market for the product or solution is small or nonexistent The product or solution has little commercial potential

<p>Sustainability</p>	<ul style="list-style-type: none"> • The product or solution would have significant social impact over a large area • The technology could easily be scaled to any size 	<ul style="list-style-type: none"> • The product or solution would have significant social impact within a limited area • The technology could be scaled somewhat 	<ul style="list-style-type: none"> • The product or solution would have moderate social impact • The technology could be scaled somewhat 	<ul style="list-style-type: none"> • The product or solution would have little social impact • The technology could not easily be scaled
<p>Teamwork</p>	<ul style="list-style-type: none"> • Team members collaborated and communicated smoothly and effectively • Team members shared the work equally, according to each member's personal strengths and experiences • All team members executed their tasks and roles successfully throughout the project • The team regularly consulted and incorporated advice from one or more mentors or experts (as applicable) 	<ul style="list-style-type: none"> • Team members collaborated and communicated effectively • Team members executed their tasks and roles equally and successfully most of the time • The team consulted a mentor or expert (as applicable) 	<ul style="list-style-type: none"> • Team members attempted to collaborate throughout the project • Each team member had specific tasks and roles to perform • Team members communicated effectively most of the time 	<ul style="list-style-type: none"> • Team members failed to collaborate on most or all aspects of the project • Team members' roles and tasks were unclear; some students did significantly more work than others • Team members' communication with one other was poor; arguments were frequent or left unresolved
